Dear Dr. Andrey Bakulin:

Congratulations on your excellent technical presentation titled, *Enhance—estimate—image: New processing approach for single-sensor and other seismic data with low prestack signal-to-noise ratio*, presented at the 2017 SEG Annual Meeting in Houston, Texas. Your research and preparation were also noticed by your fellow SEG members, who judged your paper, ranking it in the top 39 papers presented at the Houston meeting.

It is technical presentations such as yours the SEG would like to offer to its international Sections, Associated Societies, and Technical Sections. Throughout the coming year, you might find you have the opportunity to visit an area where one of these groups is located. If so, the SEG Board strongly encourages you to contact the Section or Society in the local area you are visiting and extend to them an offer to present your paper. A list of Sections and Societies affiliated with SEG and their contact information is attached.

As you might surmise, there is no financial assistance being offered to the speakers from either the SEG or the affiliated Section or Society for these technical presentations.

Once again, thank you for your excellent contribution to the 2017 Technical Program and for considering participating in the exchange of geophysical technology, in the manner described above. I appreciate the time and consideration you are giving this initiative.

Dorsey Morrow
Executive Director
